

## TECHNICAL HEALTH CHECK

### DEAR FLEXERA CUSTOMER,

Are you sure your FlexNet Manager Suite (FNMS) environment is performing as it should?

Softline Solutions' consultants have multiple years of 100% hands-on experience in large enterprise environments and complex infrastructures. This experience has been translated to a unique Technical Health Check that evaluates your implementation of FNMS against our best practices.

Use Europe's leading Flexera specialist to help you with advice and actionable recommendations on subjects such as:

- Enhancement, optimisation and configuration of FNMS at the Enterprise Level,
- Ensuring data sources are feeding correctly into FNMS,
- Connecting additional data sources and/or infrastructures to FNMS,
- Regular health checks to increase FNMS performance.

The Technical Health Check will take up a limited amount of your time in providing the necessary credentials to look into the system and providing the technical documents.

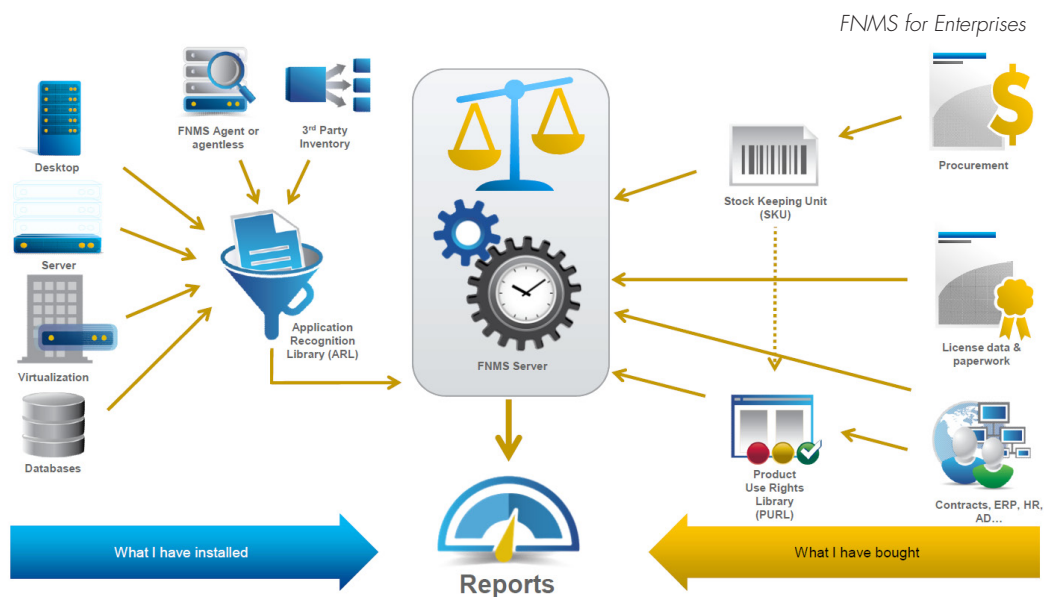

### WHY CHOOSE SOFTLINE SOLUTIONS?

- In 2014, 2015, 2016 & 2017 Softline Solutions was awarded "Flexera Software EMEA Best Performing Partner Award"
- Approach fully focused on ISO/IEC standard & best practises from hundreds of (international) SAM projects each year
- From implementation of SAM in an enterprise environment to complete outsourcing of SAM & License Management

## TECHNICAL HEALTH CHECK APPROACH

The Technical Health Check evaluates the FNMS environment on the following topics:

- High Level Design,
- Low Level Design,
- FNM Enterprise Deployment Manager,
- FNM Administration Server:
  - Overall performance
  - Central administration server
  - Distribution servers
  - VMware discovery and inventory
  - Oracle discovery and inventory
- FNM Inventory beacons,
- Agent deployment and configuration,
- Interfaces:
  - Out-of-the-box connectors
  - Business Adapter studio connectors

The technical consultant will examine all relevant documents (technical designs, information on the infrastructure and known future changes) and check these against best practises and the current environment. Any deviations from best practises, issues and incidents will be documented. If there are support cases with Flexera, these will be included as well.

Your investment in the Technical Health Check will be EUR 3.500. Experience tells us that the recommendations will definitely help you reach your SAM goals.
